

## Continued Closure Turf Progress

August 3, 2018

**SYLMAR, Calif. (Aug. 3, 2018)** – The Sunshine Canyon Landfill team reported in June that we had begun installing an additional five acres of closure turf – an impermeable synthetic liner overlain by artificial turf – over the Landfill, bringing the total to 26 acres. Since our last closure turf update, we have begun installing underground gas and liquids infrastructure to ensure adequate gas collection and liquids extraction under the closure turf. We have also continued grading slopes and installing storm water controls to promote proper drainage and have started deploying the geomembrane layer.

We initially anticipated project completion by July 31. We now anticipate completion by September 15. We will keep you informed as we make further progress.
